Inaugural lecture by Professor Nicola Martin

<https://www.lsbu.ac.uk/about-us/people/people-finder/dr-nicola-martin>

CADS

The Critical Autism and Disability Studies (CADS) research group at LSBU (amongst other things) seeks to understand and address barriers faced by autistic people in relation to gaining, keeping and progressing in employment in academic roles in our universities.

Influences

National strategy for autistic children, young people and adults: 2021 to 2026

Autistic involvement in this agenda?

Moving beyond tokenism...

Priorities:

health

education

employment

social care

criminal justice

community

Equality Act 2010

The Buckland Review

Announced 2nd April
2023

Autism Employment Review

Collaborators

EA Employment Autism

**Stakeholder
informed
(involved-
controlled)**

Useful

Respectful

Ethical

Emancipatory Research

The thorny issue of allyship

Milton (2017)

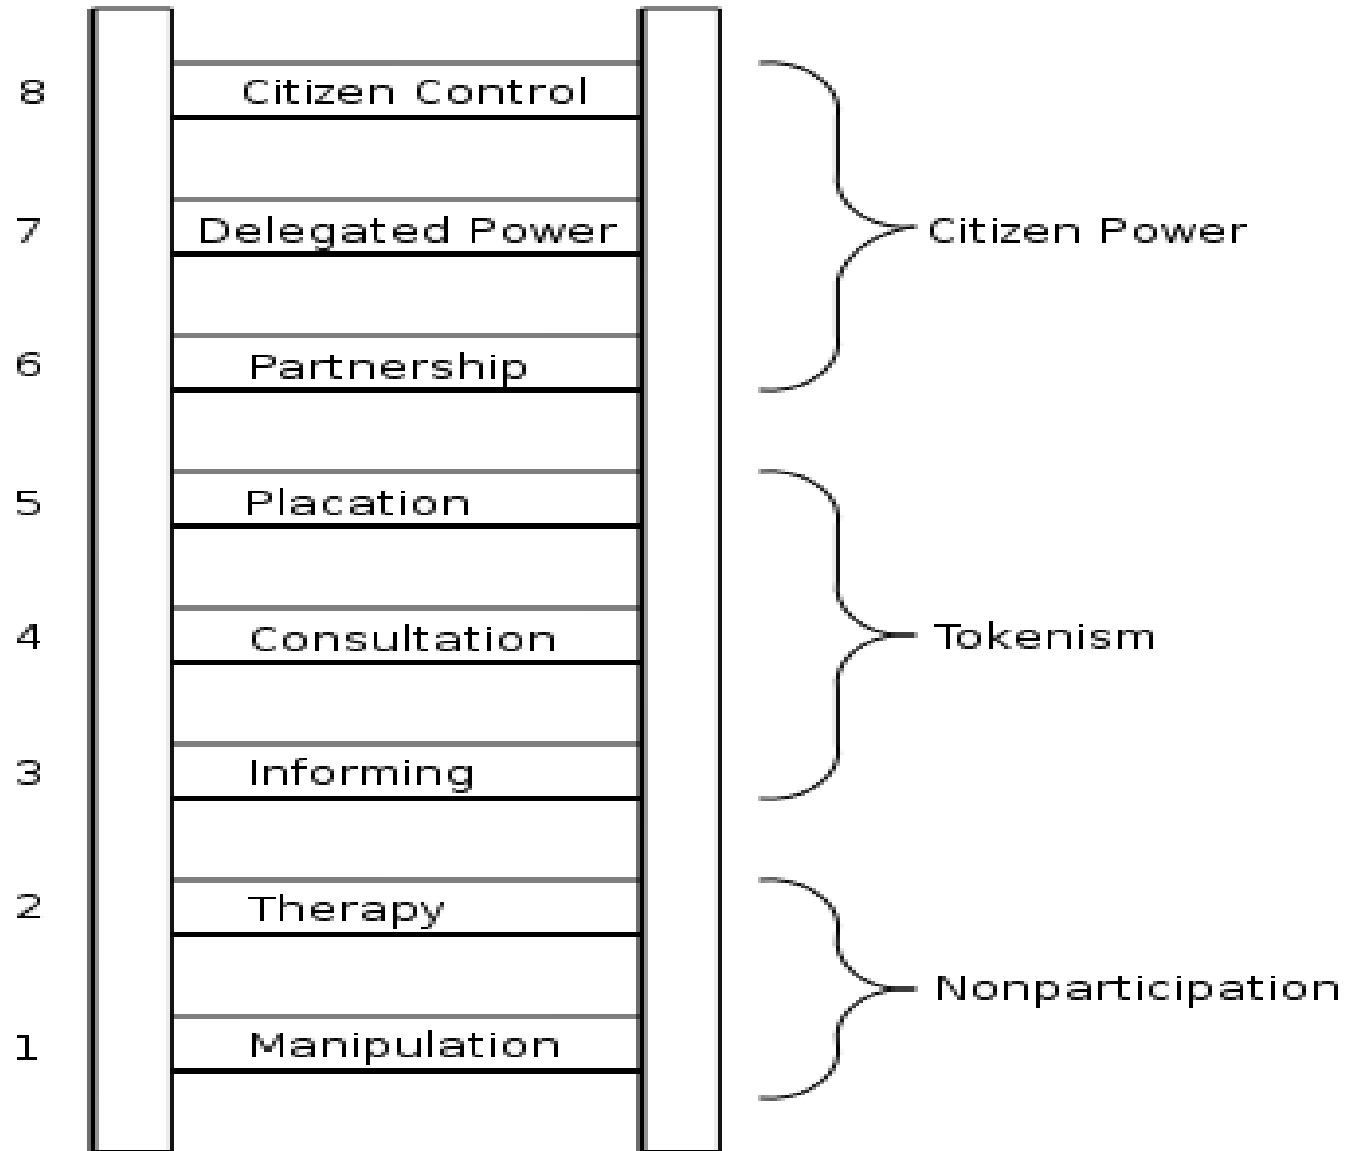

Participatory Research

- 'At the lowest end ... forms of non-participation are used by powerful actors to impose their agendas... tokenism... participants hear about interventions... may say something about them, which power holders denote as 'input'... voices of participants will not have any effect on the intervention;... does not lead to change.
- At the higher end... participation is about citizens having more power to negotiate and change the status quo. Their voices are heard *and* responded to'.
- [Levels of Participation | Participatory Methods](#); Institute of Development Studies Accessed 08-09-22

Interdisciplinary Collaborative Research

Themes

Inclusive:

- Education
- Employment
- Health and Social Care
- Older age
- Mentoring
- Research

Social Model thinking

Oliver (2013)

**SOCIAL
JUSTICE**

- **Monotropism** (Murray2018) - **In-depth interests**
- **Application /productivity**
- **Reliability /integrity**
- **Community building /mutual support /Empathy**
- **Energy /enthusiasm**

‘Beloved community is formed not by the eradication of difference but by its affirmation, by each of us claiming the identities and cultural legacies that shape who we are and how we live in the world’.

[bell hooks](#)

**Autistic
strengths**

**CELEBRATE
DIVERSITY**

Autistic challenges

- **Access to diagnostic / post-diagnostic services /services which are behind a wall**
- **Educational exclusion /unemployment / underemployment /poverty**
- **Stereotyping /threats to autonomy /agency**
- **A treacle of bureaucracy /navigating chaos**

- **Embedding Universal Design (UD) reduces the requirement for reasonable adjustment**
- **UD is about planning for diversity rather than being surprised that there is no such person as 'Mythical Norm'**
- **Autistic people know what they need**
- **Nobody thrives in chaos**

Reasonable adjustments are often cheap and easy and benefit everyone

Reliable

Empathic

Anticipatory

Logical

People and systems need to **reliably** do what they say they are going to do

Planning needs to be built on **empathically**, looking at situations from various perspectives and enacting the **anticipatory** duties of the 2010 Equality Act by planning for diverse participation

Logical workable systems communicated clearly make life easier and more productive for everyone

Universal Design for Learning

Universities do not always have support in place for autistic students at the start of their course and services are not necessarily appropriate for doctoral candidates

Employment services such as Access to Work do not easily translate into useful support

Services are often ineffective

NHS England and NHS Improvement

THE JOHN AND LORNA WING FOUNDATION

supporting autism research

THE WESTMINSTER
COMMISSION ON
AUTISM

**A SPECTRUM OF HARMFUL
INTERVENTIONS FOR**

AUTISM:
A SHORT REPORT

Diagnosis /post diagnostic support

Falling between learning disability & mental health services

Autistic people who do not use words and older family carers are often not heard

GP Health checks are not uniformly available & do not cover dentistry or mental health. Medical practitioners are not well informed about autism

**AUTISTIC DOCTORS
INTERNATIONAL (ADI)**

A way forward

- **Joined-up autism research would be useful as various funders fund similar projects**
- **Real participation of autistic people in research which is informed by the priorities of autistic people** (Pellicano, et al 2014)
- **Autistic researchers would benefit from stable employment contracts**
- **Support for organisations such as PARC**
